

Environmental Compliance Audits

What is an environmental compliance audit?

Environmental compliance audits are undertaken to determine the degree to which a company is complying with relevant:

- Environmental legislation.
- Environmental codes of practice and other guideline documents.
- Environmental permit and licence conditions.
- Standards (eg ISO14001).
- Contract conditions.
- Environmental management plans (including Construction Environmental Management Plans (CEMPs).
- Policies and procedures.

An audit typically involves interviews with site personnel, inspection of facilities and a review of documentation and monitoring data.

Why undertake an environmental compliance audit?

- Identifies areas of legal non-compliance.
- To ensure contractor are complying with contract conditions and relevant documents.
- Helps focus resourcing requirements.
- Can identify opportunities for improved sustainability.
- Allows opportunity to identify and address compliance issues before legal action is taken.
- Reduces environmental liability.

Why choose FMG Engineering?

FMG Engineering has a highly experienced, certified team able to offer the following environmental audit services:

- Environmental compliance audits.
- Independent Verification Reports (IVRs).
- Environmental management system (EMS) audit to assess compliance against the requirements of ISO 14001.
- Mining and Rehabilitation Compliance Report (MARCRs).
