

THAT'S impressive!

Thoroughbred Racetracks

FMG Engineering is recognised as expert in the design of Thoroughbred Racetracks for the racing industry. Our team of professionals provide end to end services for the design and construction surveillance of turf, sand and synthetic track surfaces. With our industry links, we listen to feedback and the needs of various stakeholders. We offer a complete solution for racetracks, training surfaces, associated facilities including stabling, mounting yards, tunnel access, winning post and coordinating sectional timing and other ancillary requirements.

Specific services that we offer include:

- Racetrack geometric design.
- Subsurface drainage design.
- Growing medium source and selection.
- Turf selection (in association with subconsultant).
- Laboratory testing of materials.
- Irrigation design (in association with subconsultant).
- Synthetic track foundation design.
- Training track foundation design.
- Training track topping source and selection.

Projects completed:

SAJC Morphettville

- Course proper reconstruction.
- Parks track reconstruction.
- Provide training track foundation and drainage design.
- Folding winning post.
- Crossover base engineering.

Murray Bridge Racing Club

- Design of new racecourse facility.
- Raceday facilities.
- Ancillary civil works.

Gawler and Barossa Jockey Club

- Concept design and feasibility works for new course proper and training tracks.
- Course proper and training track reconstruction.
- Function centre and jockeys building works.

SAJC Victoria Park

- Concept designs for alternate alignments.

Strathalbyn Racing Club

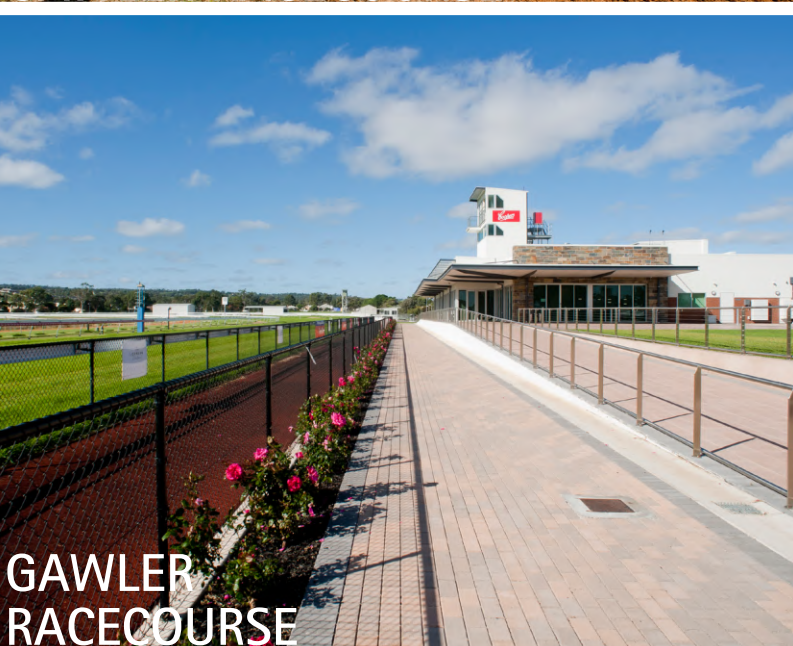

- Upgrade of existing sand training track.
